Users & groups 3

Users & groups

The Users administration form is only accessible for users with 'Manager' level permissions. The administration relies on a group-model where every user is a member of exactly one User-group. The user-group manages all permissions.

Users can be part of the local NetYCE administration or defined externally in an LDAP database.

See for detail the articles on the two tabs that make up the Users form:

- User administration
- Group administration
